

eGo-C A Type Atomizer Pack Instruction

Thank you for using Joyetech eGo-C A type atomizer pack! This atomizer pack can be used in all eGo series battery. Here is the eGo-C A type atomizer picture for your reference:

• eGo-C A type atomizer pack

eGo-C A type atomizer usage is same as that in eGo-C user manual. You can easily assemble the atomizer by putting atomizer head onto the base and screw the atomizer cover for using. For more information, please refer to eGo-C user manual.

IMPORTANT NOTICE:

There are two types of eGo-C atomizer pack: A type and B type. Here are major differences between A type and B type atomizer pack:

1. The atomizer base is same and can be used both in the two packs.
2. B type atomizer head has marked laser "B" while A type atomizer head does not have.
3. A type atomizer cover is cone shaped, while B type is cylinder shaped which can hold 2ml eliquid cartridge.

There is subtle structural difference between A type and B type atomizer head:

If you put A type atomizer head into B type atomizer body, it may cause a little leakage.

If you put B type atomizer head into A type atomizer body, it may cause a little burning taste.

Through test, in order to reach the best effect, we recommend you not to mix A type and B type pack in use.

eGo-C B Type Atomizer Pack Instruction

Thank you for using Joyetech eGo-C B type atomizer pack! This atomizer pack can be used in all eGo series battery. Here is the eGo-C B type atomizer picture for your reference:
